Vertex

Price: \$2,795.00

Telesensory's new Vertex has been developed to meet the needs of being transported “from place-to-place, time-to-time and person-to-person”. In other words, it serves visually impaired people who need to carry it around for work, study, travel or almost anywhere. At 27 lbs., the Vertex can perform well in all of these situations and function as desktop equipment. Highly mobile professionals, students and visually impaired people will appreciate the Vertex's portability, its high-quality imaging capacity and many other new innovative features.
